

NOTE from the Director:

Hello. I am Dr. Heather V. Westerfield, Director of the Chesapeake College/MGW Nursing Program. Nursing is an exciting career that can take you wherever you want to go and wherever your interests lie. You might want to work in a hospital, in a third world country, in nursing education, in an operating room, on rescue flights, with infants, with the elderly -the sky is the limit. As a nursing student at Chesapeake College, you will be learning in the classroom, of course, but you will also be learning in our new state of the art simulation labs. Our labs are designed to provide you with a genuine life like, thought provoking learning experience. You will have the opportunity to actively participate in scenarios that would take a life time to replicate in the real world. All are designed to get you ready to enter practice as a safe and effective nurse. Our goal is to prepare you for a variety of challenging practice settings. Stimulating learning activities in the classroom, in the lab, and in challenging clinical experiences will support you in your quest to earn your RN licensure (NCLEX-RN). Nursing requires education throughout your life time and we whole heartedly support lifelong learning. Chesapeake College/MGW Nursing has joined with partner universities and colleges and will assist you in smooth transfer options to achieve your Bachelors in Science in Nursing.

It is your time and Chesapeake College is your place to pursue a degree in Nursing!
